Subject: RE: proposed energia sierra juarez u.s. electric transmission line project

Gail,

Thank you very much for your message.

We do not have a specific mailing list for the project. Once the draft environmental impact statement is ready for release, we will use the Web site subscriber list to advise of its availability, and then develop a mailing list from the responses received, as well as from other sources. The Web subscriber list remains our mainstay means of communication with interested parties.

Hope this helps.

Best regards,

Jerry Pell

Dr. Pell -

I am the environmental coordinator for the Colorado Desert District of California State Parks and received your letter of 11/17/09.

Because of the proximity of Anza-Borrego Desert State Park to the project, we are interested in the project.

I have subscribed to the project website email list, but would also like to be placed on the mailing list for the project at the address below.

Thank you,

Gail Sevrens

District Services Manager
