17 November 2009

Mr. David Reese  
USM/OCAO/Occupational Safety and Environmental Programs  
Department of Homeland Security  
Washington, DC 20528

Dear Mr. Reese:

Subject: Proposed Energia Sierra Juarez (ESJ) U.S. Electric Transmission Line Project

I am writing to you today to ensure that you are aware of the subject project, and to inquire as to whether you wish to be considered, or participate, in the conduct of our ongoing analysis of potential environmental impacts.

Energia Sierra Juarez U.S. Transmission, LLC (ESJ, formerly Baja Wind U.S. Transmission, LLC), has applied to the Department of Energy's (DOE) Office of Electricity Delivery and Energy Reliability for a Presidential permit to construct either a double-circuit 230,000-volt (230-kV) or a single-circuit 500-kV transmission line on either lattice towers or steel monopoles. ESJ's proposed transmission line would connect wind turbines (the ESJ Wind Project), to be located in the vicinity of La Rumorosa, Baja California, Mexico, to the existing Southwest Powerlink 500-kV transmission line at an interconnection location in southeastern San Diego County, near the community of Jacumba, California. About  $\frac{2}{3}$  of a mile (1 km) of transmission line would be constructed in the U.S.

DOE originally considered an environmental assessment (EA) to be the appropriate level of review under the National Environmental Policy Act (NEPA), and published a "Notice of Intent to Prepare an Environmental Assessment and to Conduct Public Scoping Meetings" in the *Federal Register* on August 4, 2008 (73 FR 45218).

Since that time, the project name was changed by the applicant to Energia Sierra Juarez U.S. Transmission, LLC (ESJ), and DOE determined that an Environmental Impact Statement (EIS) was the appropriate level of NEPA review. Accordingly, a *Federal Register* "Notice of Intent to Prepare an EIS" for the ESJ project was issued on February 25, 2009 (74 FR 8517). All of these documents, along with background information, schedule, opportunity to subscribe, and more, are available on our project-specific Web site at <http://ESJProjectEIS.org>.

If you believe that you have relevant information or specific environmental issues that we should consider, or feel that you have a material interest in this matter, we would be very glad to hear from you. Please contact me at [Jerry.Pell@hq.DOE.gov](mailto:Jerry.Pell@hq.DOE.gov) (preferred), 202-586-3362, or fax 202-318-7761. My address is: Dr. Jerry Pell, U.S. Department of Energy, Office of Electricity (OE-20), Washington, DC 20585. Please note, however, that regularly mailed materials are delayed by security screening, and media such as CDs or DVDs are usually destroyed as a result.

Very truly yours,

A handwritten signature in blue ink that reads "Jerry Pell".

Dear Mr. Taylor:

Subject: Proposed Energia Sierra Juarez (ESJ) U.S. Electric Transmission Line Project

I am writing to you today to ensure that you are aware of the subject project, and to inquire as to whether you wish to be considered, or participate, in the conduct of our ongoing analysis of potential environmental impacts.

Energia Sierra Juarez U.S. Transmission, LLC (ESJ, formerly Baja Wind U.S. Transmission, LLC), has applied to the Department of Energy's (DOE) Office of Electricity Delivery and Energy Reliability for a Presidential permit to construct either a double-circuit 230,000-volt (230-kV) or a single-circuit 500-kV transmission line on either lattice towers or steel monopoles. ESJ's proposed transmission line would connect wind turbines (the ESJ Wind Project), to be located in the vicinity of La Rumorosa, Baja California, Mexico, to the existing Southwest Powerlink 500-kV transmission line at an interconnection location in southeastern San Diego County, near the community of Jacumba, California. About  $\frac{2}{3}$  of a mile (1 km) of transmission line would be constructed in the U.S.

DOE originally considered an environmental assessment (EA) to be the appropriate level of review under the National Environmental Policy Act (NEPA), and published a "Notice of Intent to Prepare an Environmental Assessment and to Conduct Public Scoping Meetings" in the *Federal Register* on August 4, 2008 (73 FR 45218).

Since that time, the project name was changed by the applicant to Energia Sierra Juarez U.S. Transmission, LLC (ESJ), and DOE determined that an Environmental Impact Statement (EIS) was the appropriate level of NEPA review. Accordingly, a *Federal Register* "Notice of Intent to Prepare an EIS" for the ESJ project was issued on February 25, 2009 (74 FR 8517). All of these documents, along with background information, schedule, opportunity to subscribe, and more, are available on our project-specific Web site at <http://ESJProjectEIS.org>.

If you believe that you have relevant information or specific environmental issues that we should consider, or feel that you have a material interest in this matter, we would be very glad to hear from you. Please contact me at [Jerry.Pell@hq.DOE.gov](mailto:Jerry.Pell@hq.DOE.gov) (preferred), 202-586-3362, or fax 202-318-7761. My address is: Dr. Jerry Pell, U.S. Department of Energy, Office of Electricity (OE-20), Washington, DC 20585. Please note, however, that regularly mailed materials are delayed by security screening, and media such as CDs or DVDs are usually destroyed as a result.

Very truly yours,

Subject: RE: Proposed Energia Sierra Juarez (ESJ) U.S. Electric Transmission Line Project

Dear Dr. Pell,

Thank you for your recent letter regarding the Proposed Energia Sierra Juarez (ESJ) U.S. Electric Transmission Line Project.

The FAA would like to point out two things that your EIS project team should consider during environmental review and planning to see if they are applicable to the project.

Advisory Circular 70/7460-1K, Obstruction Marking and Lighting, describes the standards for marking and lighting structures such as buildings, chimneys, antenna towers, cooling towers, storage tanks, supporting structures of overhead wires, etc.

If your organization is planning to sponsor any construction or alterations which may affect navigable airspace (200 feet or more in height), you must file a Notice of Proposed Construction or Alteration (Form 7460-1) with the FAA.

Descriptions of these programs and the forms can be found on the website for the office of Obstruction Evaluation:

[http://www.faa.gov/airports/engineering/airspace\\_analysis/](http://www.faa.gov/airports/engineering/airspace_analysis/)

Best of luck with the project.

Tom C.

Gail,

Thank you very much for your message.

We do not have a specific mailing list for the project. Once the draft environmental impact statement is ready for release, we will use the Web site subscriber list to advise of its availability, and then develop a mailing list from the responses received, as well as from other sources. The Web subscriber list remains our mainstay means of communication with interested parties.

Hope this helps.

Best regards,

Jerry Pell

Subject: proposed energia sierra juarez u.s. electric transmission line project

Dr. Pell -

I am the environmental coordinator for the Colorado Desert District of California State Parks and received your letter of 11/17/09.

Because of the proximity of Anza-Borrego Desert State Park to the project, we are interested in the project.

I have subscribed to the project website email list, but would also like to be placed on the mailing list for the project at the address below.

Thank you,

Gail Sevrens

Re: Participation in review of Environmental Impact Statement (EIS) Process for Energia Sierra Juarez U.S. Transmission, LLC to construct transmission line and towers.

Dear Mr. Pell:

The United States International Boundary and Water Commission (USIBWC) would like to be included in all steps within the process of reviewing environmental impacts, application for a presidential permit, and review of the EIS.

We look forward to working with you on issues related to the international boundary, specifically international treaties and agreements, border environmental concerns, USIBWC jurisdiction, and USIBWC real property. Please forward all review material to the USIBWC Environmental Management Division.

Should you or your staff have any questions, please contact me at (915) 832-4749 or Mr. Carlos Peña at (915) 832-4740.

Sincerely,

John Merino

Deputy Commander Soule,

Thank you very much for your important message. I am forwarding your e-mail to our contractor, ENTRIX, for the preparation of the environmental

impact statement (EIS), and to the applicant, Sempra Global (ESJ), for their information, addition to the administrative record, and incorporation

into our work. Please continue to keep us informed of your concerns; in particular, when the draft EIS is available, we will look forward to your

review and comments. Please consider availing yourself of a subscription to our e-mail news list that will keep you informed of developments; the

Project EIS Web site is at <http://ESJProjectEIS.org>.

Best regards,

Jerry Pell

Dr. Pell:

Subject: Proposed Energia Sierra Juarez (ESJ) U.S. Electric Transmission Line Project

The Border Patrol maintains a 60' government easement at the international boundary border fence in the project area. The entire easement is, for the most part, a 50' wide dirt road. This project should not impact our operations environmentally as long as the road surface is sufficiently maintained and correctly graded. However, below are a few concerns that we would request are addressed in this project:

a.. Border fence integrity – cross-border working: this fence is 20' steel and concrete bollard design and extremely expensive. It will not be

breached for a commercial enterprise without Office of Border Patrol, Washington, D.C. approval.

b.. Helicopter based construction in the area potentially poses a threat to our 24/7 aircraft patrols.

c.. Ability to positively identify all vehicles and personnel involved with the construction project in the immediate border area. "Cloned"

vehicles have been an issue at several border construction sites.

d.. Construction work schedule (working hours)

e.. Equipment storage area: security of unused equipment. Cross-border thieves target this type of construction equipment. The Border Patrol will

not alter its border security mission to secure commercial property in such an endeavor.

f.. Name of private security for construction equipment and materials

We (Border Patrol) have been involved in many border construction projects over the years and have developed techniques that counter attempts to

defeat security at the border without delaying or negatively impacting construction progress.

Respectfully,

Henry S. Soule

(A) Deputy Commander

U.S. Border Patrol

CERTIFIED MAIL – RETURN RECEIPT REQUESTED

Dr. Jerry Pell  
Principal NEPA Document Manager  
Office of Electricity Delivery and Energy Reliability (OE-20)  
U.S. Department of Energy  
1000 Independence Avenue, SW.  
Washington, DC 20585

Dear Dr. Pall:

The Bureau of Land Management (BLM) has received applications for rights-of-way for two separate, but related, proposed projects in eastern San Diego County. The first of these is for San Diego Gas and Electric Company's proposed East County (ECO) Substation near Jacumba, California. The proposed ECO substation would involve construction of a new 500/230/138 kV substation on about 58 acres of private land, a rebuild of the existing Boulevard substation, and construction of a new 13.3-mile-long 138 kV transmission between the two substations. The new 138 kV transmission line would traverse approximately 1.5 miles of public land managed by the BLM. The existing White Star communications facility located about 14 miles northwest of the proposed ECO substation would also be rebuilt as part of this project.

The second project is Iberdrola's proposed Tule Wind project in McCain Valley, California. The proposed project site is located on approximately 15,492 acres of land under multiple jurisdictions. The proposed project includes turbines, access roads, electrical collector and transmission lines, a substation, MET towers and storage yards/operations and maintenance facilities. The total number of wind turbines involved in the project could vary depending on the size of the turbines ultimately selected for the project. Iberdrola proposes to produce a total of 200 megawatts and to deliver them via a new transmission line that would connect to the proposed ECO substation at the rebuilt Boulevard substation.

The BLM and the California Public Utilities Commission (PUC) are planning to jointly prepare an Environmental Impact Report/Environmental Impact Statement (EIR/EIS) that evaluates both the proposed ECO Substation and, as a connected action, the proposed Tule Wind project. Upon completion of the joint EIR/EIS, the BLM will render two decisions, one for each of the proposed projects, and will document these in two distinct Records of Decision.

The EIR/EIS for the proposed proposed ECO Substation and Tule Wind project will also address the proposed Energia Sierra Juarez Transmission Line as a connected action. As you know, the

Department of Energy is currently evaluating the Presidential permit application for this proposed gen-tie between the La Rumorosa Wind Project in Mexico and the proposed ECO substation. For this reason, and in accordance with the regulations at 40 CFR 1501.6, we are writing to request you to participate in environmental review process for these projects as a Cooperating Agency because your agency either has jurisdiction by law, special expertise, or both.

Thank you for your careful and prompt consideration of our request. We look forward to hearing from you at your earliest convenience. If you have any questions regarding this request, please contact Thomas Zale at (760) 337-4420.

Sincerely,

Daniel Steward  
Acting Field Manager

Mr. or Ms. Wilson,

Thank you very much for your message; I am somewhat dismayed to learn that my letter regarding the project reached you only on 24 December, however. By copy of this message, I am asking ENTRIX, our contractor for preparation of the environmental impact statement (EIS), to coordinate and consult with you directly regarding your interest in providing input on State ranked sensitive resources that occur within the project vicinity.

Also, if you have not already done so, may I suggest that you avail yourself of the resources available on the project web site, [esjprojecteis.org](http://esjprojecteis.org), including the opportunity to register for electronic updates of new developments, postings of significant new documents, etc.; this is our major means of communicating with interested parties.

If we can work with you at this time on anything more specific, please feel free to contact me or contact directly my principal at ENTRIX, Mr. Tim Murphy, as follows:

Tim J. Murphy, AICP

Dr. Pell,

The Ca. Department of Fish and Game, San Diego Office, received your letter regarding the preparation of the Energia Sierra Juarez (ESJ) U.S. Electrical Transmission Line Project EIS on December 24th. We would much appreciate being added to any distribution list, receive any materials pertinent to this project, and participate in any collaboration or meeting. We would like to provide input to the DOE on State ranked sensitive resources that occur within the project vicinity. We are currently working with the CPUC, BLM, and FWS on the East County Substation and Tule Wind project which are all interconnected.

Thank you for the consideration,

My contact information is as follows:

Erinn Wilson  
Staff Environmental Scientist  
South Coast Region  
18627 Brookhurst Street # 559  
Fountain Valley, Ca 92708-6748  
Office: 714-968-0953

On the first, second, and third Friday of each month I will be out of the office on furlough leave pursuant to Governor's Executive Order S-16-08.

Mr. Villa,

Much thanks for your message.

By cc, I am asking our contractor for the environmental impact statement (EIS), Mr. Tim Murphy of Entrix, to work with you in this regard as the point of contact. For anything non-routine or policy-related, please do continue to feel free to contact me directly.

I am also cc'ng Ms. Joan Heredia, my contact at Semptra, the project proponent, to make her aware of your concerns and to encourage her to cooperate with you and Entrix to resolve these issues.

Also, please note the project EIS Web site, <http://esjprojecteis.org>, for information on the project; you may wish to subscribe to the e-mail list-serve, which is our primary means of public communication of news and site changes.

I hope this is responsive to your needs.

Subject: Energía Sierra Juarez U.S. Transmission

Sir,

Can you please provide me with some information and/or a POC regarding the proposed ESJ lines?

1.. Who do I need to ask to notify us when they start the actual construction on the towers? Specifically due to flight safety (hazards to terrain flight).

2.. Who do I need to coordinate with to request marker balls in certain canyons throughout our sector?

I have been and still am working with SDG&E regarding several of their 500kV lines through our sector and although most towers don't meet the FAA designated lighting/marker requirement they have agreed to our request to install them anyways. I am hoping to negotiate the same with this project.

I don't know if Ms. Carol M. Borgstrom would be able to assist me on this specific request but if you think so can you let me know and provide me with her email?

Thank you very much for your time and assistance and I hope to hear from you soon.
