Dear Dr. Pell

Este permiso no se debe darse hasta que los proponentes del proyecto presenten un estudio adecuado de los impactos ambientales derivados de este proyecto de energia eolica masiva, y hasta que se demuestre que cumple con las leyes ambientales vigentes en los EE.UU. y Mexico.

Este proyecto de construccion de 1,000 turbinas eolicas en un espacio de 2,500 kilometros cuadrados de desierto cerca de la frontera ha sido autorizado sin tener en cuenta el impacto que tendria sobre las aves, murcielagos, y los corredores de vida silvestre de la region, y podria tener efectos devastadores en especies y vida silvestre protegidas tanto en los EE.UU. como en Mexico. Este proyecto esta siendo desafiado ante los tribunales Mexicanos por una organizacion Mexicana dedicada al medio ambiente, debido a la inadecuada revision del Manifiesto de Impacto Ambiental antes de que se otorgaran los permisos.

No deben emitirse permisos por lo menos hasta que se demuestre que este proyecto esta en conformidad con la legislacion Mexicana, y que la energia producida cumple con las Normas de Energia Renovable de California.

Gracias de antemano por su atencion.

Subject: Signed Declaration: Environmental Impact Statement for US/Mexico Interconnection for "Energia Sierra Juarez"

Below is a signed declaration in opposition to the Presidential Permit proposed for Energia Sierra Juarez.

Dr. Jerry Pell

Jerry.Pell@hq.doe.gov

Office of Electricity Delivery and Energy Reliability, OE-20 U.S. Department of Energy 1000 Independence Avenue SW.
Washington, DC 20585-0001

Dear Dr. Pell

I write in opposition to the Presidential Permit proposed for Energia Sierra Juarez on the US/Mexico border (OE Docket No. PP-334).

This permit should not be given until the proponents of the project have given adequate study of the environmental impacts of this massive wind energy project, and until they can show that they are in compliance with the appropriate environmental laws in the US and Mexico.

This project to construct 1,000 wind turbines in over 1,000 square miles of wilderness near the border has been authorized without any consideration of the impact that it would have on the birds, bats, and wildlife corridors of the region, and could have devastating effects on protected and threatened species and wildlife in both the US and Mexico. This project is currently being challenged in the Mexican courts by a Mexican environmental organization due to the complete lack of review before permits were given.

No permits should be issued at the very least until it is demonstrated that this project is in compliance with Mexican law, and that the energy produced meets the California Renewable Energy Portfolio Standards.

Thank you for your attention to this matter.

Dear Dr. Pell

Este permiso no se debe darse hasta que los proponentes del proyecto presenten un estudio adecuado de los impactos ambientales derivados de este proyecto de energia eolica masiva, y hasta que se demuestre que cumple con las leyes ambientales vigentes en los EE.UU. y Mexico.

Este proyecto de construccion de 1,000 turbinas eolicas en un espacio de 2,500 kilometros cuadrados de desierto cerca de la frontera ha sido autorizado sin tener en cuenta el impacto que tendria sobre las aves, murcielagos, y los corredores de vida silvestre de la region, y podria tener efectos devastadores en especies y vida silvestre protegidas tanto en los EE.UU. como en Mexico. Este proyecto esta siendo desafiado ante los tribunales Mexicanos por una organizacion Mexicana dedicada al medio ambiente, debido a la inadecuada revision del Manifiesto de Impacto Ambiental antes de que se otorgaran los permisos.

No deben emitirse permisos por lo menos hasta que se demuestre que este proyecto esta en conformidad con la legislacion Mexicana, y que la energia producida cumple con las Normas de Energia Renovable de California.

Gracias de antemano por su atencion.

Office of Electricity Delivery and Energy Reliability, OE-20 U.S. Department of Energy 1000 Independence Avenue SW.
Washington, DC 20585-0001

Dear Dr. Pell

Este permiso no se debe darse hasta que los proponentes del proyecto presenten un estudio adecuado de los impactos ambientales derivados de este proyecto de energia eolica masiva, y hasta que se demuestre que cumple con las leyes ambientales vigentes en los EE.UU. y Mexico.

Este proyecto de construccion de 1,000 turbinas eolicas en un espacio de 2,500 kilometros cuadrados de desierto cerca de la frontera ha sido autorizado sin tener en cuenta el impacto que tendria sobre las aves, murcielagos, y los corredores de vida silvestre de la region, y podria tener efectos devastadores en especies y vida silvestre protegidas tanto en los EE.UU. como en Mexico. Este proyecto esta siendo desafiado ante los tribunales Mexicanos por una organizacion Mexicana dedicada al medio ambiente, debido a la inadecuada revision del Manifiesto de Impacto Ambiental antes de que se otorgaran los permisos.

No deben emitirse permisos por lo menos hasta que se demuestre que este proyecto esta en conformidad con la legislacion Mexicana, y que la energia producida cumple con las Normas de Energia Renovable de California.

Gracias de antemano por su atencion.

Subject: Signed Declaration: Environmental Impact Statement for US/Mexico Interconnection for "Energia Sierra Juarez"

Below is a signed declaration in opposition to the Presidential Permit proposed for Energia Sierra Juarez.

Dr. Jerry Pell

Jerry.Pell@hq.doe.gov

Office of Electricity Delivery and Energy Reliability, OE-20 U.S. Department of Energy 1000 Independence Avenue SW.
Washington, DC 20585-0001

Dear Dr. Pell

I write in opposition to the Presidential Permit proposed for Energia Sierra Juarez on the US/Mexico border (OE Docket No. PP-334).

This permit should not be given until the proponents of the project have given adequate study of the environmental impacts of this massive wind energy project, and until they can show that they are in compliance with the appropriate environmental laws in the US and Mexico.

This project to construct 1,000 wind turbines in over 1,000 square miles of wilderness near the border has been authorized without any consideration of the impact that it would have on the birds, bats, and wildlife corridors of the region, and could have devastating effects on protected and threatened species and wildlife in both the US and Mexico. This project is currently being challenged in the Mexican courts by a Mexican environmental organization due to the complete lack of review before permits were given.

No permits should be issued at the very least until it is demonstrated that this project is in compliance with Mexican law, and that the energy produced meets the California Renewable Energy Portfolio Standards.

Thank you for your attention to this matter.

Office of Electricity Delivery and Energy Reliability, OE-20 U.S. Department of Energy 1000 Independence Avenue SW.
Washington, DC 20585-0001

Dear Dr. Pell

Este permiso no se debe darse hasta que los proponentes del proyecto presenten un estudio adecuado de los impactos ambientales derivados de este proyecto de energia eolica masiva, y hasta que se demuestre que cumple con las leyes ambientales vigentes en los EE.UU. y Mexico.

Este proyecto de construccion de 1,000 turbinas eolicas en un espacio de 2,500 kilometros cuadrados de desierto cerca de la frontera ha sido autorizado sin tener en cuenta el impacto que tendria sobre las aves, murcielagos, y los corredores de vida silvestre de la region, y podria tener efectos devastadores en especies y vida silvestre protegidas tanto en los EE.UU. como en Mexico. Este proyecto esta siendo desafiado ante los tribunales Mexicanos por una organizacion Mexicana dedicada al medio ambiente, debido a la inadecuada revision del Manifiesto de Impacto Ambiental antes de que se otorgaran los permisos.

No deben emitirse permisos por lo menos hasta que se demuestre que este proyecto esta en conformidad con la legislacion Mexicana, y que la energia producida cumple con las Normas de Energia Renovable de California.

Gracias de antemano por su atencion.

Subject: Signed Declaration: Environmental Impact Statement for US/Mexico Interconnection for "Energia Sierra Juarez"

Below is a signed declaration in opposition to the Presidential Permit proposed for Energia Sierra Juarez.

Dr. Jerry Pell

Jerry.Pell@hq.doe.gov

Office of Electricity Delivery and Energy Reliability, OE-20 U.S. Department of Energy 1000 Independence Avenue SW.
Washington, DC 20585-0001

Dear Dr. Pell

I write in opposition to the Presidential Permit proposed for Energia Sierra Juarez on the US/Mexico border (OE Docket No. PP-334).

This permit should not be given until the proponents of the project have given adequate study of the environmental impacts of this massive wind energy project, and until they can show that they are in compliance with the appropriate environmental laws in the US and Mexico.

This project to construct 1,000 wind turbines in over 1,000 square miles of wilderness near the border has been authorized without any consideration of the impact that it would have on the birds, bats, and wildlife corridors of the region, and could have devastating effects on protected and threatened species and wildlife in both the US and Mexico. This project is currently being challenged in the Mexican courts by a Mexican environmental organization due to the complete lack of review before permits were given.

No permits should be issued at the very least until it is demonstrated that this project is in compliance with Mexican law, and that the energy produced meets the California Renewable Energy Portfolio Standards.

Thank you for your attention to this matter.

Office of Electricity Delivery and Energy Reliability, OE-20 U.S. Department of Energy 1000 Independence Avenue SW.
Washington, DC 20585-0001

Dear Dr. Pell

I write in opposition to the Presidential Permit proposed for Energia Sierra Juarez on the US/Mexico border (OE Docket No. PP-334).

This permit should not be given until the proponents of the project have given adequate study of the environmental impacts of this massive wind energy project, and until they can show that they are in compliance with the appropriate environmental laws in the US and Mexico.

This project to construct 1,000 wind turbines in over 1,000 square miles of wilderness near the border has been authorized without any consideration of the impact that it would have on the birds, bats, and wildlife corridors of the region, and could have devastating effects on protected and threatened species and wildlife in both the US and Mexico. This project is currently being challenged in the Mexican courts by a Mexican environmental organization due to the complete lack of review before permits were given.

No permits should be issued at the very least until it is demonstrated that this project is in compliance with Mexican law, and that the energy produced meets the California Renewable Energy Portfolio Standards.

Thank you for your attention to this matter.

Dr. Jerry Pell
Office of Electricity Delivery and Energy Reliability, OE-20 U.S. Department of Energy 1000
Independence Avenue SW.
Washington, DC 20585-0001

Dear Dr. Pell

I'm writing to express concerns regarding the Presidential Permit proposed for "Energía Sierra Juárez" on the US/Mexico border (OE Docket No. PP-334) at this time.

I understand and appreciate the need for addition renewable energy production in Mexico and the United States. I also fully support further our countries collaboration of clean energy exploration in Mexico, and I believe this will result in mutual benefits.

However, it seems apparent that additional assessment studies are needed to fully understand the environmental impacts of this Energía Sierra Juárez venture on Mexico. Furthermore, because the state of California will be the prime recipient of the energy produced, it seems that the project should be in full compliance with Mexican law, as well as policies that require the energy produced meets the California Renewable Energy Portfolio Standards.

I am a resident of San Diego, and have frequented Baja California for over twenty years. I am also involved with several well respected nonprofit and university based environmental organizations on both sides of the border who have questioned the impacts the these energy ventures would have on Baja's fragile desert ecosystems around these proposed sites.

Therefore, I sincerely believe that this permit should not be given until supporters and contractors involved in the project can accurately show that they are in full compliance with the appropriate environmental laws in the US, and Mexico. I thank you for your leadership, and I am sure you will have the publics trust in mind as you provide America's proud standard of natural resource stewardship for this project, and demonstrate our respect for the valuable environmental resources of Mexico.

Respectfully,

Nikos Zoggas
